The objectives of our HRDC are met by structuring our Orientation Programmes into four components:</p> <p>COMPONENT A: Awareness of linkages between society, environment, Development and education.</p> <p>COMPONENT B: Philosophy of education, Indian education system and pedagogy</p> <p>COMPONENT C: Resource awareness and knowledge generation</p> <p>COMPONENT D: Management and personality development</p> <p>OBJECTIVES :</p> <p>To understand the linkages between education and economic and socio-economic and cultural development, with particular reference to the Indian polity where democracy, secularism and social equity are the basic tenets of society</p> <p>Acquire and improve basic skills of teaching at the college/university level to achieve goals of higher education; Keep abreast of the latest developments in their specific subjects</p> <p>Understand the organization and management of a college/university and</p> <p>To perceive the role of teachers in the total system; utilize opportunities for development of personality, initiative and creativity; and g. promote computer literacy as well as Internet knowledge.</p> <p>The topics that are covered under each segment are:</p> <p>Education, Social justice and Social reforms, Environmental</p>	38

				awareness and biodiversity, Role and responsibility of a teacher, Human Rights, Disaster management, Science and society, Gender issues, Media and society, Secularism, Understanding the culture and society of North Eastern region Consumer rights and responsibilities, HIV/AIDS, Field visit to any distress centre.	
2	25/07/2017 2:45pm to 3:45pm	Prof. Diksha Kadam	Understanding Learning Styles For Effective Teaching	<p>Purpose: _To learn about learning styles. To understand the differences between auditory, visual and kinesthetic learners To identify your own learning style</p> <p>Content covered : There are three basic types of learning styles. The three most common are visual, auditory, and kinesthetic. To learn, we depend on our senses to process the information around us. Most people tend to use one of their senses more than the others. Today's lesson will help you determine which of these learning styles you rely on the most</p> <p>Questions to ask your student: How could knowing your learning style be of benefit to you, personally? 2. How can it be helpful in your interactions with others? 3. How do you think this could help you in your studies? 4. How do you think this could help you in lectures? 5. How do you think this could help you in note taking</p> <p>Conclusion with Questionnaire distribution and analysis of it</p>	30
3	12/09/2017 2:45pm to 3:45pm	Prof. Bhalchandra B. Pawar	Development of Smart Charging system for Lead Acid Batteries in Electric Vehicle	With the lack of centralized power grids, lead acid batteries have taken the place of one of the main energy sources available. Lead-acid batteries are finding considerable use as both primary and backup power sources. For complete battery utilization, the charger circuit must charge the battery as FAST as possible, efficiently. With this in mind, our objective is to design a cheap, versatile and Smart (Fast + Efficient) lead acid battery charger which will interest and appeal to the "time-conscious" customer.	29

				Any lead acid battery can be charged fast enough with equal to, less than or greater than current of its rating, until we can avoid overcharging of it. The Smart (Fast + Efficient) Charger is fast charging concept for lead acid batteries (LABs), with smart i.e. efficient charging. A fast charger will consist of (Constant Current-Constant Voltage power supply) + (Battery Voltage and Current Monitoring device) + (Temperature Monitoring Device) + (Circuit Voltage and Current regulator device). Through Charging if we can monitor the battery and keep it under lower threshold voltage (LTV) and warn user that it need recharge, then we can make an efficient charging system which can improve the charging time and battery life. But problem with this solution is that we are reducing the battery usability range. Now user can only use battery capacity from 50% to (80% or 100%) while earlier it has usable range from 10 % (Dead) to 90% approx. The negative point is that now user need to require larger battery capacity to cover up similar distances. The plus point is that we are increasing the battery life and charging efficiencies by keeping the battery in between 50% of capacity to 85% of capacity. This will reduce the loss in long run of system.	
4	27/04/2018 10:00am to 11:00am	Prof. Manasi Atitkar Prof. Abhijit Netke Prof. Deepak Sahoo Prof. Pravin Kharat	GST: Awareness Program	An Prof. Manasi Atitkar has gave the introduction of overview of GST. Prof. Abhijit Netke has discussed the following points: GST treatment, input credit, registration portal of GST, etc. Prof. Deepak Sahoo has discussed about GST process, computer and tally entries, IT rules. Prof. Pravin Kharat has gave the conclusion of lecture.	52
